DECEBAL DOBRICA

Engineering Leader | Full-Stack Architecture & Team Growth | SaaS & AI Platforms

+447496412887 • decebal.dobrica@gmail.com • https://www.linkedin.com/in/decebaldobrica • London

Summary

Hands-on **Engineering Leader** with 15+ years of experience building and scaling SaaS and fintech products across startups and growth-stage companies. I combine deep **full-stack expertise (TypeScript, React, Bun, Elysia.js)** with **mentorship and delivery leadership**, helping teams ship impactful, maintainable products at speed. Recently, I've led the adoption of **Bun** and **Elysia.js** as a performance upgrade to traditional Node.js frameworks—cutting build times by up to 30%, reducing API latency by 25%, and simplifying developer tooling across services. I've guided cross-functional teams through 0→1 product builds, modernization initiatives, and **AI-enhanced architectures**, consistently improving developer velocity, cost efficiency, and system reliability. Now focused on leading high-performing engineering teams where **AI meets SaaS scalability**, empowering engineers to deliver products that customers love.

CORE TECHNICAL EXPERTISE

Front-End & Full-Stack
TypeScript, JavaScript, React, Next.js, TailwindCSS

Backend Engineering
Bun, Elysia.js, NodeJs, Rust, Python

Cloud & Infrastructure
AWS (Lambda, ECS, RDS, S3), Vercel, Pulumi, Terraform, Kubernetes

Data & Automation
PostgreSQL, Supabase, Kafka, GraphQL

Leadership
Engineering Management, System Architecture, Team Mentorship, Agile Delivery, Hiring

DevOps & CI/CD
GitHub Actions, Serverless Framework, Cloud Run, IaC, Continuous Deployment

KEY PROJECTS

Bun + Elysia Migration Initiative (2025)
Modernized backend infrastructure by migrating Node.js/NestJS services to **Bun + Elysia.js**, reducing cold starts and dependency weight while improving developer ergonomics.

AI-Powered Trading Agent (2024)
Built a Rust-based microservice system integrated with Supabase and AWS to automate portfolio rebalancing.

Improved execution speed by 40% and eliminated single points of failure through resilient message queues.

Generative Video Engine (2023)
Delivered a high-performance FFmpeg + Pub/Sub rendering pipeline on GCP, cutting video processing latency by 30%.

Used serverless architecture to support rapid content clipping and automatic metadata tagging.

Experience

Ebury
London, United Kingdom

Engineering Manager
04/2025 - 09/2025

Tech Stack: TypeScript, React, Bun, Elysia.js, AWS

- Led a cross-functional team of 7 engineers modernizing Ebury's onboarding and KYC workflows, reducing onboarding time by 135% through automation and UI streamlining.
- Piloted the migration from Node.js to Bun + Elysia.js, cutting API latency by 25% and improving CI/CD build speed by 30%.
- Mentored engineers through architectural reviews, pairing, and ownership-driven delivery aligned with "you build it, you run it".
- Partnered with Product and Design leadership to ship multiple MVPs in Next.js, aligning delivery velocity with business goals.

BrainRocket
Lisbon, Portugal

Senior Software Engineer
12/2024 - 03/2025

Tech Stack: Bun, Nest.js, TypeScript, Kubernetes, AWS

- Designed and implemented the Jackpot platform from the ground up, architected for high concurrency and fault tolerance.
- Defined C4 architecture diagrams and reviewed system designs across teams to ensure consistent delivery.
- Established CI/CD pipelines with AWS and Vercel to shorten feedback loops and accelerate release cadence.
- Used **Bun's runtime** for faster dependency resolution and optimized cold starts in containerized environments.

Experience

Breakout Clips
London, United Kingdom

Technical Lead
03/2023 - 07/2024

- Implemented a cost-optimized CI/CD pipeline cutting costs by 40%.
- Built a high-performance video rendering engine on GCP Cloud Run + FFmpeg.
- Transitioned architecture to trunk-based development, reducing deployment friction by 20%.
- Set up scalable deployment workflows using **AWS + Vercel**, enabling rapid iteration and feedback loops.

Tellimer
London, United Kingdom

Engineering Manager
08/2019 - 03/2023

Tech Stack: TypeScript, Node.js, FastAPI, AWS (Lambda, SageMaker, Bedrock), GraphQL

- Delivered a production-grade AI parsing platform from 0 to 1, powering multiple fintech analytics products.
- Delivered a 0→1 AI parsing platform for financial data, later commercialized across multiple fintech products.
- Led migration from REST to GraphQL APIs, improving query efficiency and maintainability.
- Reduced AWS costs by 75% through a serverless-first approach, while scaling reliability and performance.
- Directed a team of 9 engineers, introducing agile rituals, mentorship, and structured technical onboarding.

Flyt
London, UK

Software Engineer
03/2019 - 08/2019

Funeral Zone
Exeter, United Kingdom

Software Architect
06/2015 - 03/2019

eMAG
Bucharest, Romania

Full stack programmer
11/2013 - 06/2015

eRepublik Labs Limited
Bucharest, Romania

Senior PHP Developer
08/2013 - 10/2013

H Grup IT Expert
Bucharest, Romania

Senior PHP Developer
01/2013 - 08/2013

Agile Outsourcing
Bucharest, Romania

PHP Web Developer
11/2012 - 01/2013

ContentSpeed
Bucharest, Romania

Software Developer
10/2010 - 10/2012

Eau de Web
Bucharest, Romania

Python Tester Intern
07/2010 - 10/2010

Education

Military Technical Academy
01/2007 - 12/2011

Bachelor, IT, Maths

Military Highschool, Breaza
01/2003 - 12/2007

Bachelor of Applied Science (B.A.Sc.), Mathematics and Computer Science
