TypeScript, Javascript, React, Next.js, TailwindCSS

Backend Engineering
Python, FastAPI, Node.js, Rust, NestJS

Cloud & Infrastructure
Vercel, AWS (Lambda, RDS, S3, ECS), Pulumi, CloudFormation, Kubernetes

Data & Automation
PostgreSQL, Supabase, GraphQL, Kafka, NATS.io

Leadership
Engineering Management, System Architecture, Technical Hiring, Mentorship

DevOps & CI/CD
GitHub Actions, GCP Cloud Run, Serverless Framework, Pulumi, Terraform

KEY PROJECTS

Agentic AI Automation Platform (2025)
Architected a Python + FastAPI system that orchestrates multiple LLMs via Bedrock and LangChain to automate onboarding workflows. Integrated event-driven triggers via AWS Lambda.

AI-Powered Trading Agent (2024)
Designed and deployed a serverless AI system using Rust and Supabase to auto-rebalance multi-exchange trading strategies.

Generative Video Engine (2023)
Built and deployed an AI-assisted video processing pipeline (FFmpeg, Pub/Sub, Cloud Run) for automated content clipping.
